

ECOtanka™

take-a-tanka!

stainless steel drink bottles

The ecologically friendly alternative to plastic

ECOtanks™ are high quality solid 304 stainless steel drink bottles

Stainless steel offers one of the most hygienic surfaces available. It is very easy to clean and it's unique surface has no pores or cracks to harbor dirt, grime or bacteria. Your bottle will stay completely clean and safe for years upon years.

ECOtanks™ are ultra light, they are not lined with any material and they do not break down or leach in any way. The lids are made from stainless steel and/or polypropylene #5 plastic. All bottles and lids are non-leaching, non-toxic and 100% BPA free!

Drinks from an ECOtanka™ taste incredibly clean and fresh, while the stainless steel holds them cooler for longer periods of time. Neoprene material **KOOLER™** covers are also available to insulate your bottle and keep it cold for longer. Pop ice cubes into your bottle, fill and then fit a cooler cover to enjoy a drink that will stay cool for hours in the summer time!

The ECOtanka™ name and branding is designed to help encourage you to fill and take your own bottle and to re-use it over and over again.

Each year we are drinking 30 billion throw-away bottles of water worldwide! If you put the bottles end to end, they would go around the world more than 150 times... and that is every single year! Most plastic bottles end up in landfill and can take up to 1000 years to biodegrade.

There is a floating pool of 3 million tons of plastic waste in the Pacific Ocean called "The Great Pacific Garbage Patch" that is twice the size of France! Please do your part to help keep our world green, clean and beautiful for your children and the generations to come. **Take-a-tanka!**

Stainless Steel has a life expectancy of over 100 years, and is 100% recyclable

ECOtanka.com

ECOtanks™ come in a wide range of sizes, from the 350ml Teeny Tanka through to the 2 litre Mega Tanka! A growing selection of purpose designed lids are also available, including easy-sip toddler spouts, sports lids, stainless steel screw caps and even an adaptor for fitting baby teats! There is an ECOtanka™ for every member of the family and for every purpose.

ECOtanks™ are very easy to care for, simply wash and rinse as you would your dishes, or place in the dishwasher. Alternatively, baking soda and warm water can be used to cleanse and freshen your bottle. They may be sterilized with boiling water. Please do not place in the freezer.

Visit ECOtanka™'s website to view the full range of bottles and accessories, including any new additions that may be available!
